Candice,

- 1) Sensitivity analysis - Lets meet on Wednesday, May 3 (1:00 to 3:00). We can use my cell number unless you want to set up a screen share meeting. I don't think it will be necessary.

888 742 5095
1889344801

- 2) I will send you a document tomorrow linking scenarios to permits and watershed memos. I will also provide some recommendation on a potential "next review". We have a couple of candidates.
- 3) We've analyzed Delano and the South Fork Crow River thoroughly. Let me know if you have questions or want more information on a particular topic.

Spring in the north; good one. It was snowing up here this morning.

Steve

Subject: Follow-up from our last call

Hi Steve-

We had a few "to dos" from the last call that I wanted to follow-up on.

First, I committed to scheduling a meeting with you and our staffs to go through the sensitivity analysis so that we can better understand the use of load-based and concentration-based phosphorus limits. For us, it looks like the following times would work (in order of preference): Wednesday May 3, 1-3pm, Monday May 1 1-3pm, Thursday May 4 9-12am, and Friday May 5 10-2. Please let me know if any of those times work for you.

Also, I was curious if you had been able to prepare the updated scenario spreadsheet that identified memos and permits and if there were any scenarios you thought it would be best for us to focus on after Delano.

Last, I wanted to let you know that we have been working on a follow-up letter on Delano. However, we wanted to further review the information provided in Rebecca's email received on April 22nd prior to finalizing the response. I apologize for the delay in this task, but I hope to be able to give you an update on Monday.

I hope you are starting to enjoying spring up north! Talk to you soon!

Candice
